

DARAY[®] SL100

MOBILE MINOR SURGERY LIGHT

VALUE AND PERFORMANCE

The Daray SL100 is an invaluable tool for those conducting procedures under local anaesthetic in health centres, GPs' surgeries and outpatient departments.

The light is intense and has a natural daylight coloured light-patch.

REFLECTOR

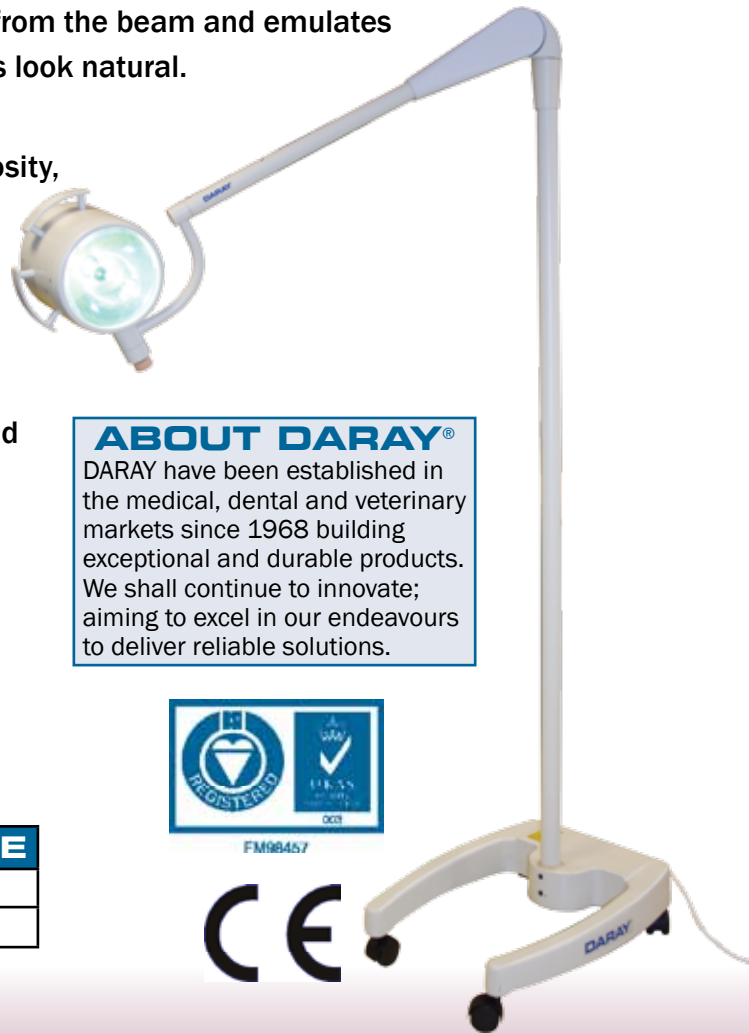

The light is built around a 60mm diameter reflector with a specialised optical coating that filters out 90% infra-red radiation (heat) from the beam and emulates daylight so that skin tones look natural.

HALOGEN LAMP

Specifically designed for high luminosity, accurate focusing and long life.

MULTI-PURPOSE

Ideal for surgery, ophthalmology, OBS delivery operation, diagnostics and gynaecology. Also suitable for use within casualty departments and intensive care units.

ABOUT DARAY[®]

DARAY have been established in the medical, dental and veterinary markets since 1968 building exceptional and durable products. We shall continue to innovate; aiming to excel in our endeavours to deliver reliable solutions.
