Front view

Adjustable light-source

The user can adjust the intensity, or turn on or off any of the four individual LED light-source zones to achieve the best possible image. The magnified image can be displayed on the LCD screen, for real-time viewing.

Alternatively images can be viewed externally via USB or the AV port situated on the rear of the device.

Reticules and grids

User-selectable reticules and grids assist the user with grid-reference observation, data accumulation and simple measurement.

Side view

Save images and video

Take photos or capture video; save the files to the built-in SD memory card and then view the files later on-screen with up to 4x digital zoom.

The memory can be upgraded with larger MMC/SD cards (up to 512 MB).
